

ENRIQUE MEJÍA FONTANOT

5537338584 ◇ enrique.mejia.fontanot@gmail.com ◇ Mexico City, Mexico

EDUCATION

Instituto Tecnológico Autónomo de Mexico

2012-2018

Bachelor in Political Science

Bachelor in Applied Mathematics

Additional activities:

Member of the University Council of Honor and Excellence (2015)

Summer course in Political Economy - Stanford University (Summer 2016)

Study abroad - Pontificia Universidad Católica de Chile (Autumn 2016)

Overall GPA: (87/100)

EXPERIENCE

Independent Data Science Consultant

Mexico City, Mexico

Senior Consultant

September 2023 - Present

- Provide end-to-end data strategy, machine learning engineering, and product development services for diverse private clients. Partner with executive stakeholders to translate complex organizational problems into data-driven solutions.
- Design and deploy scalable machine learning architectures using LLMs and NLP, optimizing for cost, latency, and responsible Artificial Intelligence practices.

Rackspace Technology

Mexico City, Mexico

Data Scientist III

February 2025 - December 2025

- Led technical strategy and architectural design for enterprise-grade Generative AI and NLP solutions, utilizing LangChain to build custom applications.
- Served as a founding member of the Foundry for Generative AI by Rackspace (FAIR), driving responsible AI adoption, establishing governance frameworks, and mentoring junior data scientists on best practices for model deployment and evaluation.

Data Scientist II

April 2022 - February 2025

- Developed predictive data products for internal stakeholders utilizing NLP, Machine Learning, and statistical methods.
- Authored technical documentation and delivered custom product presentations, translating complex model outputs into actionable strategic insights for non-technical stakeholders.

Data Scientist I

September 2021 - April 2022

- Removed technical debt by migrating an all-Python ecosystem into BigQuery Machine Learning and Vertex AI, accelerating deployment times and increasing team bandwidth for new product development.

Digital Agency for Public Innovation

Mexico City, Mexico

Data Products and Solutions Coordinator

February 2020 - June 2021

- Designed data pipeline architectures and utilized Apache NiFi and Hadoop as the technical lead of a city-wide Master Data Management effort dealing with large volumes of civic data in relational and non relational formats.

- Engineered ELT pipelines between various government agencies and the Digital Agency for Public Innovation.

Strategic Information Use Deputy Director

February 2019 - February 2020

- Automated critical data processes, including the monthly ingestion, transformation, and update of the Mexico City public crime dashboard and the open data portal.

ACADEMIC RESEARCH EXPERIENCE

University of California at Berkeley

Mexico City, Mexico

Research Assistant to Dr. Mathias Poertner

April 2016 - February 2019

- Conducted data wrangling and statistical modeling in R on the LAPOP country datasets and the Bolivian national censuses (2001, 2012).
- Compiled, cleaned, and analyzed extensive datasets regarding political party affiliates to support research on political participation, social identities, and multi-method social science.

Harvard University, Harvard Kennedy School

Mexico City, Mexico

Research Assistant to Dr Candelaria Garay (Harvard University), Dr Brian Palmer-Rubin (Harvard University), and Dr Mathias Poertner (University of California at Berkeley) *July 2017 - September 2017*

- Supervised the application of 1,400 survey instruments in Mexico City and Chiapas for experimental and quasi-experimental social science research.
- Extracted data using Python APIs, executed rigorous cleaning with Pandas, and utilized Geographic Information Systems to map geographical data from INEGI and INE. Contributing to complex data processing that resulted in two published peer-reviewed articles in World Development and Comparative Political Studies.

TECHNICAL SKILLS

**Programming & ML
Generative AI**

Python, R, SQL, Javascript
OpenAI suite, Braintrust, LangSmith, LangChain,
Ollama, Agentic Engineering, RAG architectures.

Cloud & Data Engineering

GCP, AWS, HDFS,
MongoDB, PostgreSQL, Apache NiFi.

Visualization & GIS

Tableau, Plotly, GeoPandas, QGIS, PostGIS, Leaflet.

DevOps & Product Tools

Git, GitHub Actions, GitLab,
Docker, Terraform, Helm,
REST APIs, GraphQL, React JS, Node JS.

LANGUAGE SKILLS

Spanish

Native speaker

English

Cambridge C2 Proficiency

French

Introductory level
